

BEAUMONT

# Quality Policy

It is the policy of top management to establish and maintain an effective quality management system that is sufficiently capable of fully integrating with all of the company's measurable objectives. The effectiveness and implementation of all processes defined in both the company quality procedures manual and other operational process documentation shall be reviewed at scheduled intervals and planned in conjunction with other operational team and management functions.

The quality management system requirements of BS EN ISO 9001:2015 and the Regulatory duties under Section 11A and Schedule 3A of the 1985 Weights and Measures Act and the Metrology Act 1996 (Eire) are an integral part of the Companies activities and the Company is committed to provided the resources necessary to conform to and maintain these requirements to the highest standard.

Every employee within the company is accountable, responsible and expected to ensure that all processes, products and services that we provide conform in all respects to the contractual, legal, and quality requirements of all our customers.
